

COMMUNICATION CLOTHES

ABSTRACT

A communication clothes provides a communication connection to a mobile phone
5 for hearing and conversing use. The clothes has a pocket to hold a connector which links
respectively to a speaker and a microphone hidden on the collar, and also links to a
keyboard hidden at a selected location on the clothes. An user may wear the clothes and
engage the mobile phone with the connector in the pocket. The user may hear the
incoming call and converse through the speaker and microphone located on the collar.
